Hebrew · English

PROFILE

Lead Product Designer experienced in AI-powered products, data-rich ecosystems and complex UX systems. I combine product thinking, visual craft and hands-on execution to translate complex requirements into clear experiences that serve business goals. I build scalable design systems and design-to-development processes that help teams deliver faster, and I tie design decisions to outcomes such as engagement, customer satisfaction and development time.

CORE EXPERTISE

Product Design · AI Experiences · UX/UI & Interaction · Design Systems · Prototyping & Research · Information Architecture · Design–Engineering Collaboration

EXPERIENCE

Lead Product Designer
Jan 2025 – Oct 2026

Revuze

- Led product design across an AI- and data-rich ecosystem of four hubs, serving multiple personas and simplifying complex information hierarchies and workflows.
- Established design-to-development practices that had not existed before: structured handoff and spec reviews, daily developer collaboration, and hands-on support with implementation challenges.
- Created the Prototype Portal to demonstrate and validate features with clients before development, combining user research with clear engineering specifications.
- Built reusable design patterns and a design system suited to AI-assisted product work, including a workaround for the absence of Storybook and initial Storybook work.
- The combined prototyping, handoff and collaboration process cut feature development time by up to 50%.

Senior UX/UI Designer
2024 – Jan 2025

Centrical · Maternity-leave replacement

- Led design for the launch of a new AI assistant and supported critical infrastructure updates across multiple products.
- Partnered with developers to align interfaces with technical requirements, improve design workflows and deliver consistent experiences.

Senior UX/UI Designer
2022 – 2024

KUDO

- Led design of a new AI product line from wireframes through delivery, and established KUDO's design system across platforms.
- Used customer usability testing and data analysis to refine complex UX systems, working with Product, Engineering, Research and Marketing.
- Helped launch KUDO Meeting and KUDO AI Self-Serve: +15% user engagement and +10% customer satisfaction.

ADDITIONAL EXPERIENCE

Owner & Designer
2011 – 2024

Nitzan's Studio

- Branding, web design, UX/UI and marketing services, with brand strategies and marketing plans built around client goals.

Marketing Director
2021 – 2022

Kaplen JCC

- Led marketing plans and campaigns, developed the brand identity, set KPIs and OKRs, and supported community events.

Brand Designer
2020 – 2022

Osem USA

- Adapted Osem's brand for the US market while keeping its core identity, tailoring the visual direction to local consumers.
